## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

#### DETAILED ACTION

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1732, Examiner Leo Tentoni.

#### *Specification*

2. The abstract of the disclosure is objected to because in line 1, ``is disclosed'' is a phrase which can be implied and should not be used in the abstract. Correction is required. See MPEP § 608.01(b).

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

4. The disclosure is objected to because of the following informalities: On page 4, line 1, ``FIGURE 2'' should be - -  
FIGURE 3 - - .

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Lamson (U.S. Patent 6,093,010).

Lamson (see the entire document, in particular, note col. 3, line 50 to col. 7, line 64) teaches a process of rolling lips about the open mouths of stacked thermoplastic containers as set forth in the instant claims. Note that, unlike instant independent claim 1, instant independent claim 11 does **not** require that the containers be heated while the containers are engaged on the screw assembly (i.e., instant independent claim 11 recites "heating the containers with the heater").

***Allowable Subject Matter***

7. Claims 1-10 are allowable over the prior art references presently of record.

8. Claims 14-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 1732

9. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art references, alone or in combination, disclose, suggest or teach a process of rolling lips about the open mouths of stacked thermoplastic containers including the step of discharging a supply of heated air toward the containers as they are engaged on the screw assembly as set forth in instant independent claim 1.

### **Conclusion**

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Blackwelder et al (U.S. Patent 5,026,338) teach a process of forming a rolled rim on a thermoplastic container, including the use of heated air (note Figures 3 and 10, and associated text), but does not teach a screw assembly.
